

Ballistic Parachutes at the Northeast LSA Expo

Many Light Sport Aircraft (LSA) come equipped with ballistic parachutes, but the history of using parachutes on aircraft goes back much further. This presentation will also take a look at the accident record of ballistic parachutes used in production aircraft and when a chute has (and has not) been effectively used. Please see the "Additional Seminar Information" section for more information on this and other seminars at the 2013 NorthEast LSA Expo. See you there!

Directions: Please park on the grass. Seminars in white building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
